

To whom it may concern: I am an XM Satellite Radio subscriber as well as an FCC licenseholder who relies on the traffic and weather information XM provides. Simply put, there is no AM or FM radio station the National Association of Broadcasters represent that can even come close to offering the level of information XM does for their subscribers, or the quality and variety of entertainment, music, and news that. I pay for the valuable service XM provides and take offense that the NAB lobby would try to persuade the FCC to dictate from which media outlet I can and cannot get my information from. Therefore, I urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the programming their subscribers want and need most.
